SILENCE

Use this resource to encourage a calm and collaborative learning environment.

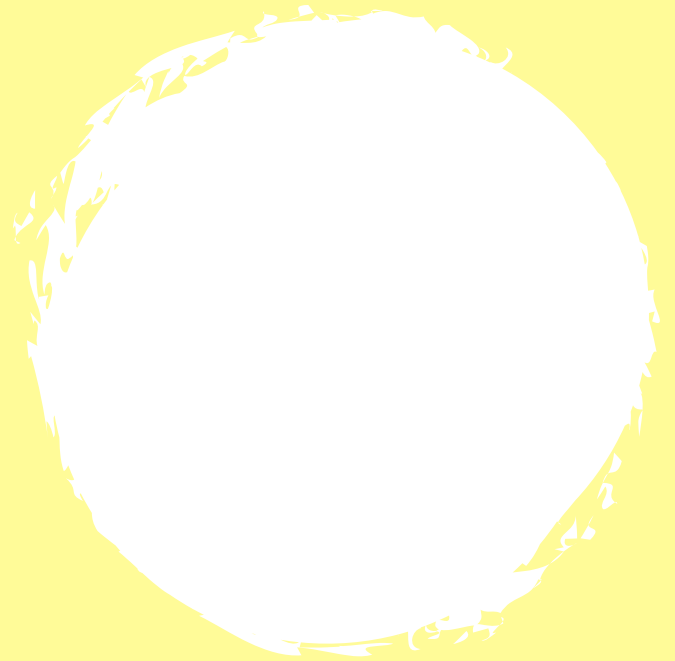

The circular space is designed for the addition of a battery-powered push light that signals the noise mode students are on. Alternatively, a mark of some kind, or movement of the attached star, could also signify the chosen noise level.

This resource supports teachers in setting clear boundaries in the classroom to suit the activity and keep children on task, moving to a quieter mode if students are becoming distracted and need redirection and a reminder of the expectations.
