

# GOAL SETTING

A few ideas for how to use this resource:

- Print one per child, have them set their own goals for the new year, specific to their learning, and use as a bookmark in their books to also mark what page they're up to (ideally laminated and could even be attached to their book with string!)
- Print one per child and allow them to set goals based on anything they like, store these until the end of the academic year and then at the end of the year, they can re-open them and see if they reached their goals
- Set goals with each child during a particular subject, use this as a bookmark for their book and they can mark off a goal throughout the rest of the academic year when you agree it has been met
